RÉGIMA

RégimA is the most advanced, medically accepted skin care programme created to attack the ageing free radicals and toxins associated with modern living. These elements are responsible for most of the skin's visible signs of ageing, including loss of skin tone and wrinkles.

RÉGIMA POWER PEEL

As we get older, the natural process of skin cell renewal begins to slow down, and consequently we begin to see changes such as lines and wrinkles, age spots and pigmentation.

The RégimA Power Peel uses a peeling process through a unique method, that embraces natural ingredients and organic acids, to help you produce collagen and elastin.

The skin peel is a very mild procedure that simply removes your dead skin cells, or the cells that are damaged, from the very top layer of the skin. This then stimulates the metabolism of the skin cells that are beneath that top layer. As the old, damaged or dead cells are removed, the new layer is revealed. The skin is therefore completely rejuvenated with a radiant, improved texture, and new youthful glow.

RégimA have developed a new generation of in-salon Power Peels which essentially comprise organic acids, such as raspberry, apple, peach, lemon, milk and various other natural ingredients that enable the superficial removal of dead skin cells.

The Power Peel safely restores a youthful appearance effectively, but very gently and through various natural acids. This rejuvenates and improves colour, texture and the tone of your skin. It also smoothes out the fine lines, bringing back the health and regenerating the general glow of youth- giving you a 'rapid radiance' regardless of your age. It is also very safe to have the treatment if you are pregnant.

The Power Peel offers what RégimA calls, rapid radiance or the "Flash effect". It does this by giving skin a renewed elasticity, through instant smoothing of the fine lines and facial wrinkles. It can also help with the elimination and control of skin pigmentation as well as removing sun spots, liver spots or aging spots, on both your face and your hands. The peel can also help with the stubborn dark skin patches under your eyes.

As well as this, the Power Peel can also help with the treatment of problematic skin, scarring, hypertrophic and keloids scars, acne scarring, old skin graft areas and even burns. It is safe to use on all areas of the face (including neck and eyes) and other areas of the body and can help with anti-aging process on your hands.

MICROBLADING

Microblading is a semi-permanent treatment that gives you perfect, fuller eyebrows that look completely natural, on any skin tone, with any shade range. In a process, similar to tattooing, delicate hair strokes are drawn onto the skin while also depositing pigment.

The result is a semi-permanent perfect brow, that can last between one and three years, depending on your skin type.

Arcana's specially trained microblading therapist will recommend the perfect colour, shape and size to provide you with the most natural looking results.

All initial microblading consultations are free.

LED MASKS

LED (Light-Emitting Diode) therapy is a modern, non-invasive treatment that uses different wavelengths of light to visibly improve and rejuvenate skin. The treatment is suitable for all skin types and works in just ten minutes.

The treatment is proven to:

- Plump and lift complexion
- Brighten skin
- Hydrate from the inside out
- Improve uneven tone and texture
- Boost blood flow
- Energise and repair cells
- Build collagen and elastin
- Treat the mind body and soul

DERMANEEDLING

Dermaneedling (also known as Microneedling), is a cosmetic procedure that involves pricking the skin with tiny, sterilized needles.

These minute wounds cause your body to make more collagen and elastin, which heal your skin and help you look younger.

This treatment:

- * Helps reduce fine lines and wrinkles
- * Makes skin look firmer and more plump
- * Helps with pigmentation

DERMAPLANING

Dermaplaning is a non-invasive procedure to create smoother skin. Our trained therapist gently skims the surface of the skin using an exfoliating blade, (also removing unwanted hair). It's used by those wanting a more youthful and soft complexion, to minimise dullness and the appearance of minor skin damage. This facial exfoliation treatment is quick and minimises the appearance of fine lines.

This treatment:

- Provides immediate results and is low risk
- Allows make up to look better/smooth
- Promotes collagen production
- Prevents breakouts
- Is good for sensitive skin
